

"If Children are happy, they will achieve!"
 Spring 2022

SUBJECT SNAPSHOT

RECEPTION
 Reception have been learning all about our local area of Berkeley. They have been using Google Earth on the IWB to look around Berkeley and locate key buildings in the areas.

LITTLE JESTERS
 Little Jesters have been learning all about maps. They have been making their own treasure maps and making them look authentic!

YEAR 2
 Year 2 have been looking at aerial photographs above our school and have been constructing their own map and key!

YEAR 1
 Year 1 have been comparing the UK with a non-European country - Australia. They have been listening to stories and comparing images. They have been finding similarities and differences between their lifestyles and weather in the areas.

YEAR 4
 Year 4 have been finding out about the difference between physical and human geography. They have been looking at natural and man-made things from Egypt. Crystal mountains and the pyramids were a big hit among Year 4.

YEAR 3
 Year 3 have been looking at cardinal and intercardinal points of a compass. They had a discussion about who would need and why you would need one. They have even linked magnetic fields to their science work too! They have been using the compass on the field to direct one another from one point to another.

YEAR 5
 Year 5 have been finding out all about Ancient Greece. They have been investigating Ancient Greece and have been comparing two places in terms of their geography. They have been conducting their own research in order to find similarities and differences.

YEAR 6
 How were Tudor maps made? Why did the Tudors want to explore the world? What was the Golden Age of exploration? Year 6 have been busy learning and answering these key questions from learning how they created maps to the reasons why expansion and trade became important during Elizabeth I's reign.
